

**Economic Modernisation Vision Executive Program  
(2023- 2025)**

“

The vision is clear, and the only way forward is through action and achievement to build a new Jordan—a modern state rooted in participation, active citizenship, the rule of law, and dedicating all available resources to development; a state led by its young men and women, with their limitless aspirations and relentless resolve.

”

**Abdullah II bin Al-Hussein**

# Introduction

---

The Economic Modernisation Vision is an essential pillar within the course of comprehensive reform called for by His Majesty King Abdullah II Ibn Al-Husein with the goal of unleashing national potential in various sectors. An effort to forge inclusive and sustainable growth that ensures creating job opportunities for Jordanians and ensuring a better quality of life for citizens. The Speech from the Throne at the Opening of the Second Ordinary Session of the 19th Parliament contained ten clear Royal directives for the government to move forward with the reform process and emphasized the importance of the Economic Vision in attracting investment, supporting economic growth, and providing job opportunities for young Jordanians over the next decade.

The Vision included key principles for drawing a clear roadmap for the future of Jordan, in which the private sector would play a pivotal role in the economic activity, based on two strategic pillars: accelerated economic growth and improved quality of life for all citizens, while sustainability is a cornerstone of this Vision in an effort to achieve the national priority goals, with the overarching goal of generating one million new jobs for Jordanians in the labor market.

The Executive Program for the Economic Modernisation Vision (2023-2025) reflects the government's commitment to delivering the Modernisation Vision as a key pillar in the comprehensive modernisation process led by His Majesty the King in its three political, economic and administrative spheres, including initiatives, projects, legislations and priority procedures in the various development sectors, which all relevant ministries and institutions will put into practice within the timelines contained therein. The Executive Program for the Economic Modernisation Vision (2023-2025) serves as a starting point for subsequent Executive Programs, thereby paving the way for achieving targets related to growth, job creation, investment and partnership with the private sector.

The program comes in light of the exceptional economic and financial challenges experienced by Jordan due to global crises, external shocks and their aftermath on the economic sectors. Its development has also coincided with the completion of the Fifth

Review of the Economic Reform Program developed by the Government of Jordan and supported by the International Monetary Fund (IMF). A review that commended Jordan's reform approach and the prudence of its fiscal and monetary policies, while maintaining future growth projections of economic performance within the present levels under these exceptional circumstances.

The executive program, which is complemented by the Public Sector Modernization Roadmap, features (135) initiatives as part of the vision's eight drivers (High Value Industries, Future Services, Destination Jordan, Smart Jordan, Sustainable Resources, Invest Jordan, Green Jordan, and Vibrant Jordan), adopted according to the readiness and availability of funding, taking into account the alignment with the economic reforms matrix, sustainable development goals, and contribution to providing added value for growth and employment, and enhancing partnership with the private sector, as the total cost of the program is JD 2.115 billion until the end of 2025. The program also included the review, amendment and approval of legislative packages and action plans to improve Jordan's ranking in international indicators and reports.

The Executive Program is featured by its inclusion of initiatives associated with women's economic empowerment, including legislative reviews and measures to improve Jordan's ranking in the Global Gender Gap Index, as well as the continued implementation of the action plan related to improving Jordan's ranking in the Women, Business, and the Law Report, and development of a national index to monitor and track women's economic participation.

In developing the Priorities Program, the government has pursued the same participatory approach, which was the title for the Vision's development process. Whereas sectoral task forces were formed, whose membership includes the public sector, along with representatives of the private sector and experts from different sectors and were key to the development process by reviewing the Vision's document and its proposed initiatives, aligning them with the sectoral strategic plans and elaborating the final output of the Vision's Executive Program in a form that reflects the goals and aspirations of the Vision.

Moreover, the Executive Program is a living and flexible document that is subject to annual revision and assessment in line with the government's economic developments and priorities. As such, it includes a specific timeframe for implementation, clear indicators to measure performance, and an online system to monitor progress.

## Summary of the Economic Situation

The Jordanian economy achieved positive results during the period (2009-2020), supported by growth in national exports, an increase in foreign investments, and a rise in the pace of remittances from Jordanians working abroad, with an average growth rate of 6.5% during that period.

Due to the repercussions of the global financial and economic crisis in 2009, and the ramifications of the security instability in the region in 2011, followed by the influx of around 1.3 million Syrian refugees into the kingdom, and the resulting pressures on public finances and essential government services such as health, education, transportation, water, sanitation, among others, in addition to the repercussions of the COVID-19 pandemic, the economic growth rate slowed down during the period (2010-2022), averaging not more than 2.2%.

Despite the economic contraction caused by the pandemic, which reached 1.1% in 2020, the national economy has shown a clear trend towards recovery from its effects during the year 2021, driven by government measures taken in the healthcare sector, monetary and fiscal measures taken to mitigate the pandemic's effects, including lifting lockdown measures and allowing economic sectors to operate, leading to positive growth of 3.7% during the year 2021. The positive growth rate continued during the year 2022, reaching 2.4%, driven by the revival of tourism, full economic reopening, and improvement in exports. During the first three quarters of 2023, the economic growth rate reached 2.7% compared to 2.6% during the first three quarters of 2022.

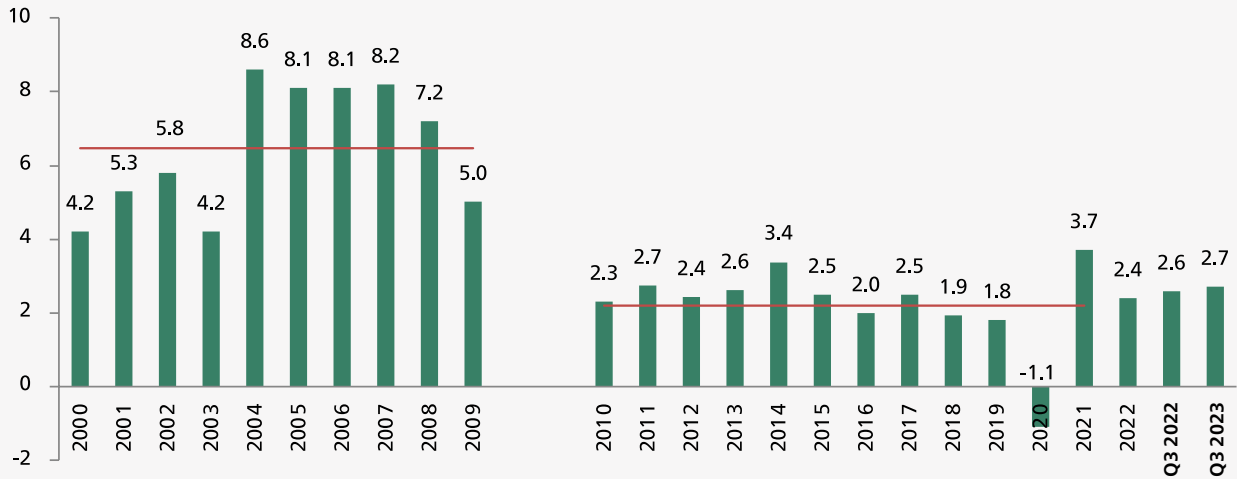

## Real GDP Growth Rate Trend

Average Real GDP Growth Rate %6.5

Average Real GDP Growth Rate 2.2%

### Real GDP Growth Rate Trend

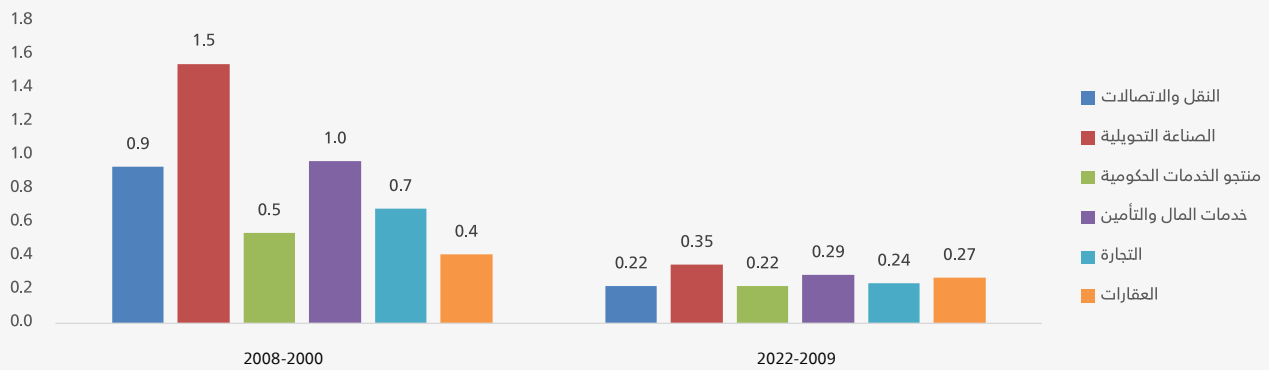

The shocks that the national economy underwent during the past decade have led to a general change in the structure and composition of the economy. On the supply side, the real estate sector has risen to the third position in terms of its contribution to the real economic growth rate (0.27% or equivalent to 11.3% of the real growth rate, which is 2.4%) during the period 2009-2022, surpassing important sectors such as transportation and trade. On the

demand side, private consumption expenditure has expanded due to the influx of around 1.3 million Syrian refugees into the kingdom, at the expense of government consumption expenditure and gross capital formation, while the relative importance of net exports in gross domestic product has improved. Consequently, there is an urgent need for further diversification of economic activity and a shift towards an economy that relies more on productive sectors for its growth and is capable of producing exportable goods and services.

## Contribution of Key Sectors to Real GDP Growth Rate

Average Real GDP Growth Rate 6.5%

Average Real GDP Growth Rate 2.4%

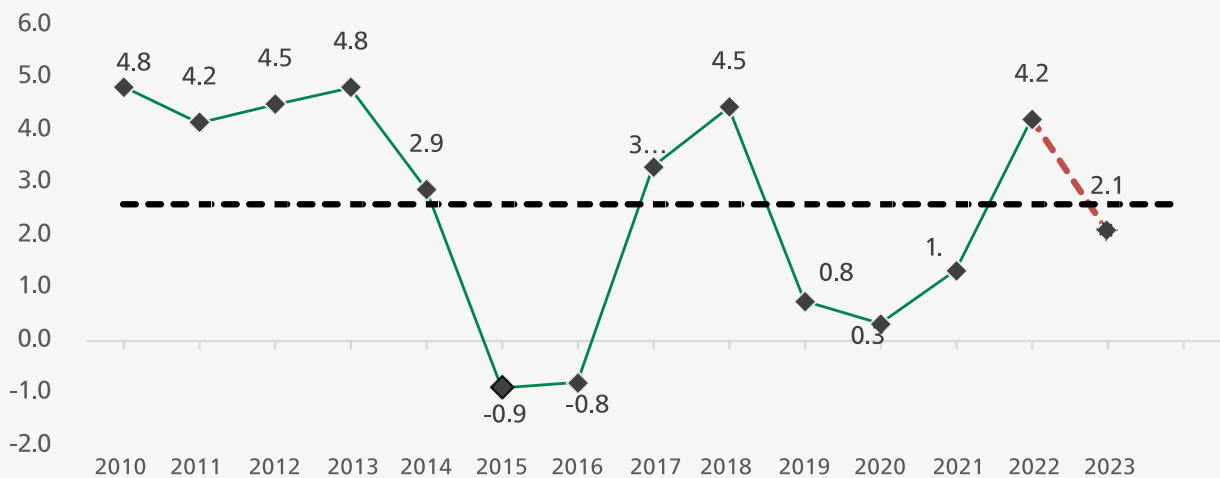

### Inflation Rate

The inflation rate recorded moderate levels during the period (2010-2023), averaging 2.6%. This is despite the liberalization of oil derivatives prices in 2012 and the upward trend of oil prices during that period and the subsequent period. Due to the decrease in domestic demand and global prices as a result of the lockdowns caused by the COVID-19 pandemic, the inflation rate decreased to 0.3% during the year 2020. It then rose to 1.4% in 2021

due to the return of growth rates to pre-pandemic levels. However, during the year 2022, due to the expansion of global inflationary pressures resulting from the rise in food and energy prices, the annual inflation rate increased to 4.23%. Fiscal and monetary policies and preemptive measures by the government to contain inflationary pressures contributed to this, with the inflation rate reaching 2.1% by the end of 2023, compared to 4.2% in 2022.

### Inflation Rate Trend

Average Inflation Rate (2010-2023) 2.6%

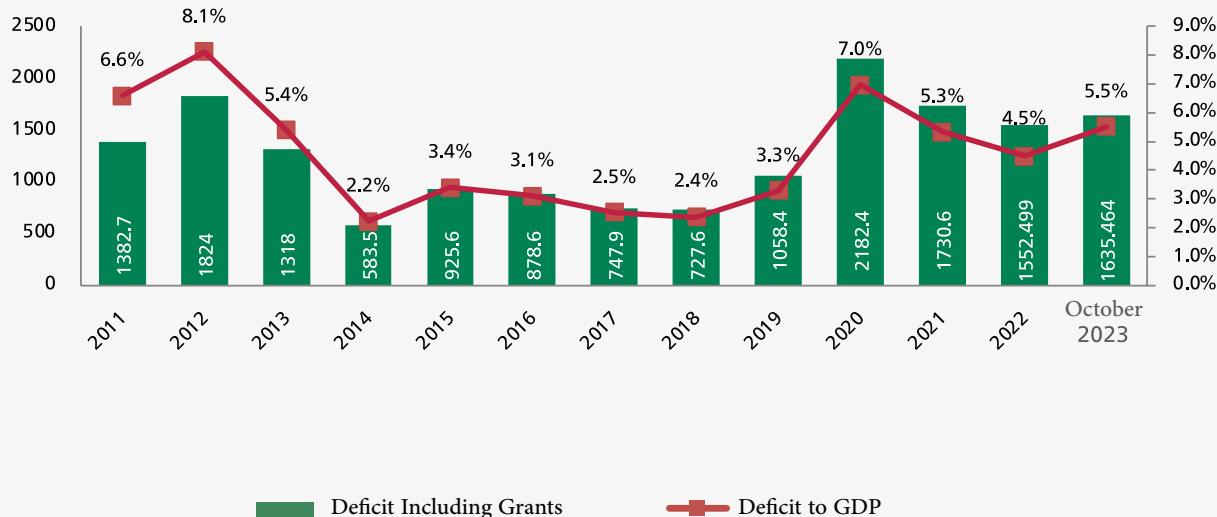

## Public Finance Sector

- General Budget:** General Budget: The general budget has been suffering from a chronic deficit that reached record levels of around 8.1% of the Gross Domestic Product (GDP) (after grants) in the year 2012. This was primarily due to a decline in the overall revenue growth rate, with relatively stable expenditure levels. Various financial reforms, especially in the tax system, had a significant impact on stabilizing public finance indicators, leading to a decrease in the budget deficit to 2.4% of the GDP in 2018. However, the financial repercussions of the

COVID-19 pandemic raised the budget deficit to 7% of the GDP in the year 2020. Reflecting the economic recovery status, the government managed to achieve the targeted estimates for local revenues in the General Budget Law during the year 2021. This resulted in a decrease in the actual budget deficit to 5.3% of the GDP. The deficit continued to decrease in 2022, reaching 4.5% of the GDP. Meanwhile, the fiscal deficit after grants amounted to 5.5% during the first ten months of 2023 compared to the same period of the previous year.

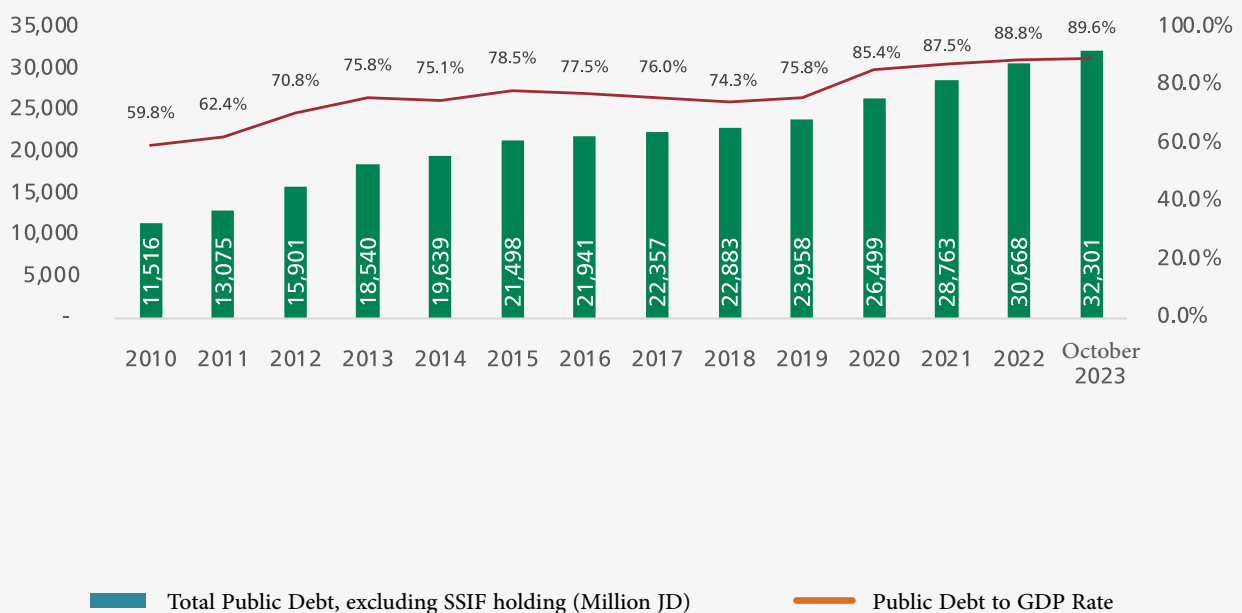

### Deficit as percentage of GDP

- Public Debt:** The public debt averaged 74.8% of the Gross Domestic Product (GDP) during the period (2011-2020) as a result of the continuous deficit in the general budget. Its ratio reached 85.4% in 2020, the highest during this decade, due to the repercussions of the COVID-19 pandemic on the budget and the burdens of financing the deficit of the Water Authority and the installments of the guaranteed loans for the Jordan Electric Power Company. The public debt continued to rise in 2021 to 87.5% after excluding what the Social Security Investment Fund (SSIF) holds. It reached 88.8% of the GDP during 2022.

Regarding the year 2023, available data for the first ten months of the year show an increase in public debt to 89.6% of the GDP after excluding what the Social Security Investment Fund (SSIF) holds, amid intense pressure on the general budget. Despite the challenges related to the budget deficit and levels of public debt, the government managed to meet the requirements of the Economic Reform Program 2020-2024 while maintaining the Kingdom's credit rating issued by international credit rating agencies, despite the economic conditions experienced by all countries worldwide.

### Total Public Debt, excluding SSIF

## Monetary Sector

During the period from 2010 to 2022, the monetary sector achieved positive results, characterized by maintaining comfortable levels of foreign reserves sufficient to cover imports of goods and services for an average of 7.2 months, which exceeds twice the international standard. The total foreign reserve balance reached approximately 17.3 billion dollars at the end of 2022, compared to 13.0 billion dollars at the end of 2010. Bank deposits also increased by an average of 5.8% annually to reach about 42.1 billion dinars by the end of 2022, compared to 22.5 billion dinars at the end of 2010.

Credit facilities for all economic sectors also increased by an average of 7.2% annually to reach 32.6 billion dinars at the end of 2022, compared to 14.5 billion dinars at the end of 2010. Local liquidity recorded an average annual growth rate of 5.9% to reach about 41.7 billion dinars at the end of 2022, compared to about 22.3 billion dinars at the end of 2010.

Despite ongoing global challenges and uncertainty due to geopolitical situations and the continuation of the global inflationary wave during 2023, the total foreign reserve balance reached 17.5 billion dollars at the end of October, sufficient to cover the Kingdom's imports of goods and services for about 7.7 months. The dollarization rate decreased to 18.0% at the end of October 2023, compared to 18.7% at the end of 2022, and 19.0% at the end of 2021. Moreover, the total deposit balance increased

by 1.4 billion dinars (3.3%) annually to reach about 43.3 billion dinars at the end of October 2023, with most of it being in dinar deposits. Credit facilities also increased by 3.1% to reach approximately 33.3 billion dinars at the end of October 2023 compared to the same period of the previous year.

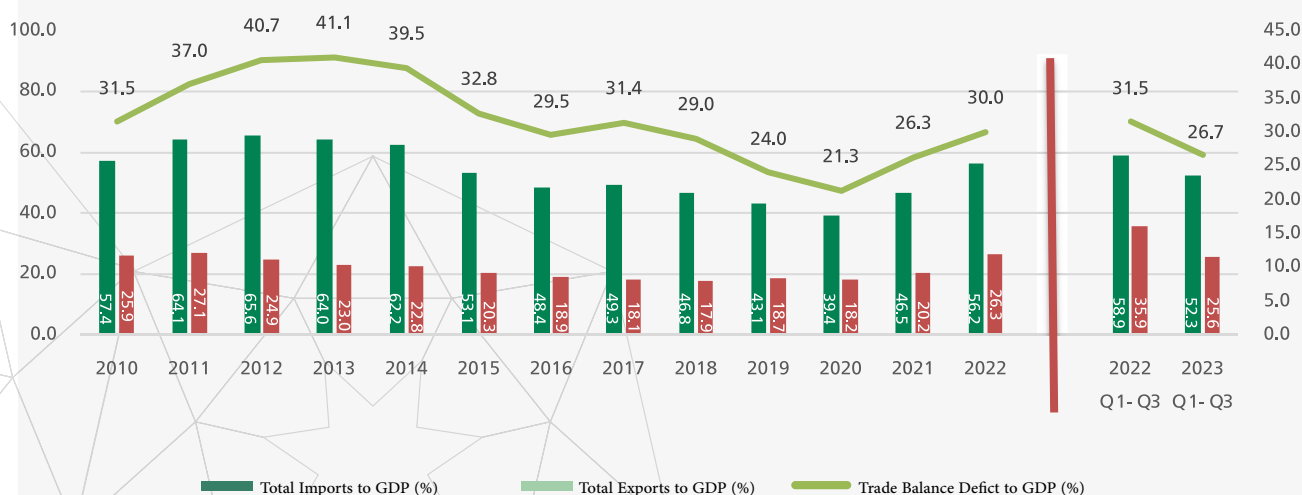

## Foreign Trade

The Jordanian economy is generally influenced by changes in the global economy and particularly by the economies of its trading partners, owing to the relatively small size of the Jordanian economy and its openness to the external world. The Jordanian economy faces numerous challenges, including scarcity of primary resources and the regional and global political conditions and their impact on the movement and prices of goods.

The evolution of foreign trade as a percentage of Gross Domestic Product (GDP) during the period 2010 – 2023-Q3

- Trade in Goods: Trade in goods constituted approximately 80% of the Kingdom's Gross Domestic Product (GDP) on average over the past two decades. Imports have comprised the larger portion of this trade due to the weakness of the industrial base and heavy reliance on the external world to provide various types of goods and production inputs. Consequently, the trade

### The development of foreign trade as a percentage of Gross Domestic Product (GDP) during the period 2010 – 2023-Q3

balance has suffered from a chronic deficit, averaging 33% of the GDP annually over the past two decades. However, this deficit decreased to 21.3% during the year 2020 due to a larger decrease in the value of imports compared to exports, resulting from the conditions of the COVID-19 pandemic and the decline in global trade volume. The deficit increased to 26.3% during 2021 as recovery began and activity resumed. Subsequently, the deficit returned to its previous levels, reaching around 30% during 2022, due to rising commodity prices and increased demand.

During the first three quarters of the year 2023, and as a result of the global decline in commodity prices, the total exports of the Kingdom decreased by 2.4% compared to the same period in 2022, reaching 6764.0 million dinars. This decrease was due to a 2.0% reduction in national exports, which amounted to 6272.0 million dinars, and a 7.3% decrease in re-exported goods, amounting to 492.0 million dinars.

Imports also decreased during the first three quarters of 2023 by 7.0% compared to the same period in 2022, amounting to 13841.6 million dinars.

Consequently, the deficit in the trade balance (which represents the difference between the value of imports and the total value of exports) decreased during the first three quarters of 2023

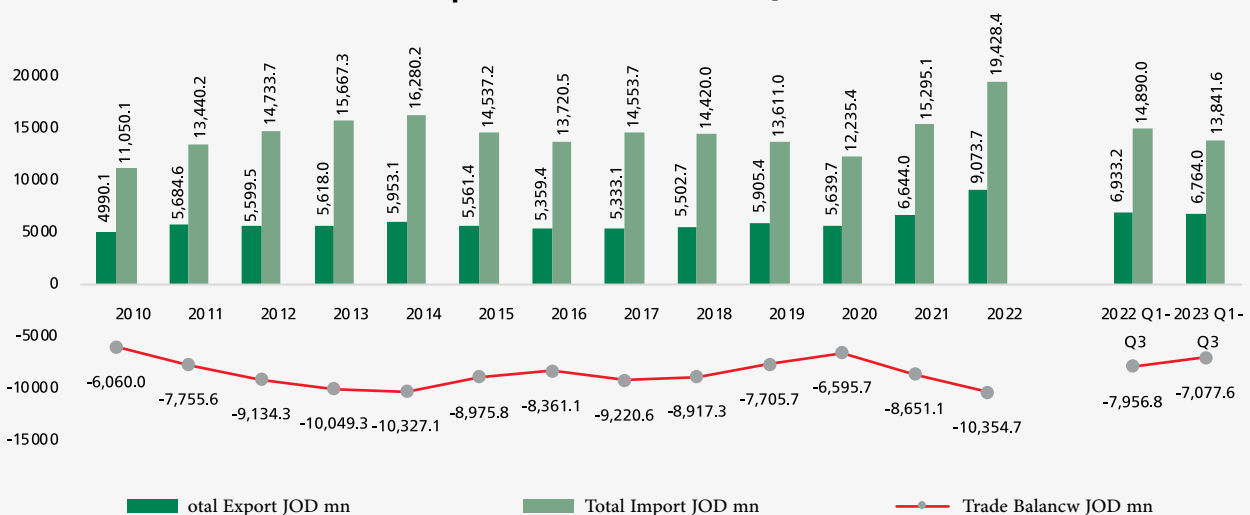

by 11.1% compared to the same period in 2022, reaching 7077.6 million dinars.

The development of foreign trade (in million dinars) during the period 2010–2023-Q3

Trade in Services: The Jordanian economy is characterized as a service-based economy, which necessitates an increased focus on the competitiveness of service sectors at both the domestic and international levels. Alongside the tourism sector, there is a need to further capitalize on other service sectors, such as financial services, telecommunications, and information technology, which keep pace with developments in the digital economy, as well as the transportation sector, which offers immense potential given Jordan's geographic location on trade routes.

The balance of services recorded a surplus during the period (2010-2019), averaging 5.1% annually of the Gross Domestic Product (GDP), compared to a deficit averaging 0.2% during the period (2000-2009). However, in 2020, due to the COVID-19 pandemic, the trade in services balance recorded a deficit of 1.3% of the GDP, marking the first deficit since 2005. It resumed a surplus in 2021, reaching 0.8% of the GDP, approaching levels to reach 4.7% during 2022. During the first three quarters of 2023, it achieved a surplus at a record level of 8.2% of the GDP, attributed to a significant increase in tourism income

**The development of foreign trade (in million dinars) during the period 2010 – 2023-Q3**

### Assumptions Underlying the Macroeconomic Framework (2023-2025)

- Maintaining and expanding levels of domestic and foreign private direct investment.
- Maintaining the current level of capital expenditures over the next three years.
- Maintaining financial and monetary stability and adequate levels of foreign reserves at the Central Bank of Jordan.
- Continuing the implementation of fiscal reforms by reducing the deficit and limiting the growth of public debt and its service burdens.
- Achieving sustainable growth in exports over the next few years.
- Enhancing global economic conditions in terms of supply chains, energy and food prices, and growth rates.
- The continued presence of Syrian refugees as a long-term phenomenon not a temporary one.

### Projections of Key Economic Indicators (2023-2025)

## The economic policy and vision for economic modernization (2023-2033)

The government, through its economic policy, aims to accelerate economic growth and improve the citizens' standard of living by granting a larger role to the private sector as a growth engine and unleashing economic potential. This involves diversifying economic activities and focusing on stimulating both local and foreign investments in high-value-added production sectors.

The vision for economic modernization entails creating a comprehensive economic framework and a roadmap for the next ten years. It focuses on economic growth, quality of life, and sustainability, targeting an average annual GDP growth rate of around 5.6%. This is to be achieved by focusing on various economic drivers, including future services, high-value industries, and tourism. Additionally, it aims to attract investments averaging 3.5 billion Jordanian Dinars annually. The results of this growth are expected to be translated into improved living standards by creating one million job opportunities, increasing real income per capita by 3% annually on average, and raising citizens' satisfaction with quality of life to 80% by the end of 2033. Moreover, the aim is to elevate Jordan's ranking in global competitiveness indices to be within the top 30%, while considering environmental sustainability factors.

The economic modernization vision has adopted a gradual path to achieve its targets, aiming for an average growth rate of around 4.3% during the period 2023-2025. Efforts will then be made to stimulate growth rates to approximately 6.5% annually in subsequent years.

As for the current executive program (2023-2025), it comes amidst growing global economic uncertainty and central banks' trend towards continuous interest rate hikes, along with expectations of persistently high oil prices. This has implications for the prices of strategic commodities and shipping, as well as reduced global demand for goods and services, and difficulty accessing financing for developing countries, affecting national exports and foreign direct investment. As a result, the expected economic growth rate is anticipated to average 2.8% annually. In addition to the aforementioned external challenges, the national economy continues to face internal challenges, including structural imbalances in public finance, financial constraints, the burden

of Syrian refugees—especially given the decline in international grants provided to the kingdom to address refugee needs—weak industrial base, heavy reliance on external energy sources, high unemployment rates, and escalating climate change risks amidst increasing scarcity of water resources.

### Financial policy

The government, through effective use of fiscal policy tools, aims to maintain financial stability in the kingdom. This involves achieving secure levels of the general budget deficit and public debt by enhancing tax administration, preventing tax evasion and avoidance, and customs evasion. Additionally, the government seeks to increase the efficiency of government spending and diversify sources of public debt. Through fiscal policy, the government also aims to alleviate financial burdens on citizens, especially tax burdens, and protect the middle class. This is to be achieved by increasing the proportion of direct taxes in total tax revenues, enhancing the social safety net, and avoiding the imposition of new taxes or fees.

### The Monetary Policy

The monetary policy of the Central Bank of Jordan primarily aims, as specified in its law, to maintain monetary and financial stability. Monetary stability in Jordan consists of three elements: firstly, maintaining the exchange rate of the Jordanian Dinar fixed against the US Dollar as a nominal anchor for monetary policy since 1995. Secondly, preserving stable and moderate inflation rates, which reflect the purchasing power of the local currency and help maintain it. Lastly, establishing a moderate structure for interest rates in the long term. This stability, which sits atop the central bank's priority list, is of great significance to the economy as it serves as the cornerstone for overall economic stability. Additionally, the Central Bank of Jordan seeks to achieve other objectives including the implementation of partial and comprehensive prudential regulatory policies that contribute to achieving banking and financial stability in the Kingdom.

## Labor Market

The labor market in the Kingdom faces several structural challenges, with the inability of the national economy to create sufficient job opportunities being at the forefront. This challenge arises from the continuous increase in the number of job seekers, in addition to the competition from both licensed and unlicensed foreign workers for the newly created jobs, and the mismatch between the outputs of the education system and the needs of the labor market. Furthermore, the public sector's capacity to employ has declined due to exceeding its actual needs for employees.

In light of the existing challenges, the government will focus in the coming period on restructuring the labor market. This will involve developing the inspection system, occupational safety and health, automating work-related permits, reducing violations occurring in the work environment (such as child labor), empowering women in the labor market, increasing their economic participation through the application of flexible work arrangements, organizing childcare matters, and other measures that affect citizens' lives and lay the foundation for their future.

On the other hand, the economically active population in the Kingdom was estimated to be only about 32.6% of the working-age population in the third quarter of 2023, while 67.4% were economically inactive. When distributed by gender, it appears that 52.7% of males are economically active compared to only 13.5% of females. The low rates of economic participation represent a missed opportunity for Jordan, as the female labor force participation rate in Jordan is one of the lowest in the world. Moreover, the Global Gender Gap Index reveals that Jordan ranks 126th out of 146 countries in 2023 and is fourth among 13 countries in the Middle East and North Africa region.

**Economic Modernisation Vision Executive Program  
Priorities (2023- 2025)**

## Main Features of Economic Modernisation Vision

### Executive Program (2023-2025)

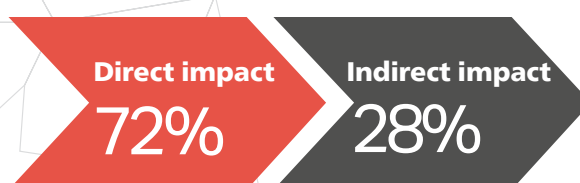

- A living and flexible document that will be reviewed and revised annually in line with the developments, in a complementary manner with the Economic Modernisation Vision Document and the Public Sector Modernisation Roadmap.
- A participatory Executive Program through four ministerial committees and (22) task forces across agencies.
- The Executive Program includes (135) initiatives, selected from approximately (380) initiatives identified in the Economic Modernisation Vision.
- The Executive Program includes (514) priorities with a specific timeframe for implementation.
- Priorities include policies, procedures and projects for each driver and sector.
- Adopting prioritization criteria in terms of project readiness for implementation, identifying owners, and funded from the public budget or foreign aid.
- Priorities consistent with the key objectives of supporting economic recovery and growth, creating job opportunities, and promoting participation.
- Reviewing, revising and enacting (73) legislations.
- Alignment with the Economic Reforms Matrix, Sustainable Development Goals, and sectoral strategies and plans.
- Priorities related to women economic empowerment and increasing women economic participation.
- Action plans to improve Jordan's ranking in international indicators and reports
- Setting macroeconomic targets 2023-2025.
- An electronic system to monitor performance and achievement through the Prime Ministry Delivery Unit (PMDU), defining performance and achievement indicators and an (Online Dashboard) that will be accessible by the public.

## Women Empowerment Initiatives in the Executive Program

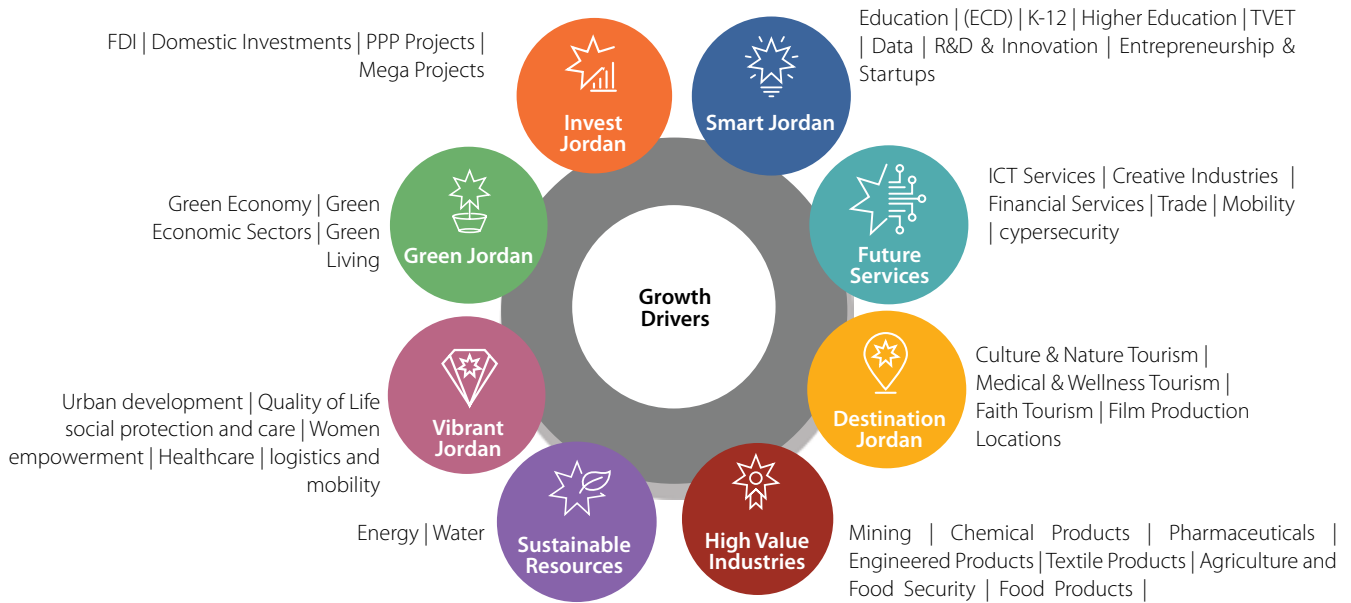

### for the Economic Modernisation Vision, Priorities (2023-2025)

- Implementing the Women Empowerment Strategy in the Economic Modernisation Vision, which was launched on 4/12/2022
- Reviewing the laws and regulations to enhance women economic empowerment
- Developing a national index to monitor and track women economic participation
- Improving Jordan's ranking in international reports

#### Impact of the Initiatives on Women Empowerment:

# Drivers of the Economic Modernisation Vision

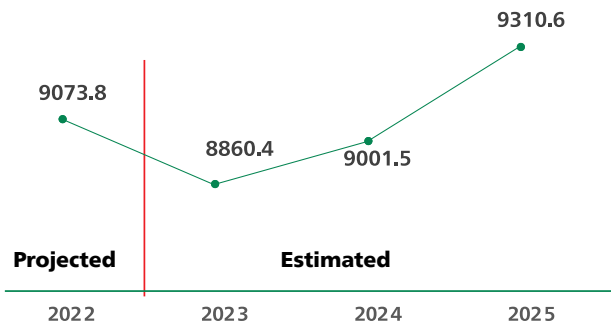

Objectives	
 <p><b>High Value Industries</b></p>	Develop Jordan into a regional industrial hub through high growth exports with high quality and value products
 <p><b>Future Services</b></p>	Achieve excellence in services sectors to enhance national development and increase exports of services on regional and global levels
 <p><b>Destination Jordan</b></p>	Position Jordan as a prime tourism and film production destination
 <p><b>Smart Jordan</b></p>	Develop and prepare local talents to meet the needs of future skills, required resources and institutions to accelerate economic growth and enhance quality of life
 <p><b>Sustainable Resources</b></p>	Optimise the use of natural resources to ensure sustainability, unleash inclusive sectoral growth and enhance quality of life
 <p><b>Invest Jordan</b></p>	Stimulate domestic and foreign investments through an attractive and efficient investment and doing business ecosystem
 <p><b>Green Jordan</b></p>	Support sustainable practices as a pillar of Jordan's future economic growth and enhance quality of life
 <p><b>Vibrant Jordan</b></p>	Improve quality of life for Jordanians through developing and adopting higher life standards that revolve around the citizen and the environment

Initiative	2023	2024	2025	Owner
Attract and stimulate domestic and foreign investments	Developing the interactive investment roadmap *			Ministry of Investment
	Launching an online platform for investors (Invest Jo), which includes (laws, manuals, legislations, and promotional sectors...)			Ministry of Investment
	Reviewing the procedures governing PPPs and projects development			Ministry of Investment
	National Road Map for Investment			Ministry of Investment
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Develop an investor database and Investor Relationship Management (IRM) System	Developing Customer Relationship Management (CRM) Systems			Ministry of Investment
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Developing and implementing an action plan to improve Jordan's ranking in the Future of Growth Report			Ministry of Planning and International Cooperation
	Developing and implementing an action plan to improve Jordan's ranking in FDI Regulatory Restrictiveness Index			Ministry of Investment
	Further implementing the action plan to improve Jordan's score in Women, Business, and the Law Index			Ministry of Planning and International Cooperation
Strengthen and develop the investment environment	Facilitating new financing partnerships (participation in existing companies - Equity Co-Investment Fund)			Ministry of Investment
	automation and activation of comprehensive investment services			Ministry of Investment
	Conducting a study to identify and market investment opportunities			Ministry of Investment
	Conducting sector-specific market studies			Ministry of Investment
	Preparing an advisory guide for public-private partnership project contracts			Ministry of Investment
	Preparing a guide for typical financial obligations requirements for public-private partnership projects			Ministry of Investment
Develop international investor outreach strategy and launch a promotional campaigns program	Providing advisory services to market investment opportunities			Ministry of Investment
	Launching and implementing the Investment Promotion Strategy			Ministry of Investment

## Mega Projects and Public-Private Partnerships (PPPs)

of the Executive Program (2023-2025)

Project	Estimated Investment Size (Million JOD)
Management and operation of the multipurpose port within the new Aqaba port area	10
Management and operation of King Hussein International Airport in Aqaba	50
Establishment of a medical university/Saudi Jordanian Fund	290
Green Hydrogen and Green Ammonia Production Project	4000
Aqaba Amman Water Desalination and Transport Project (The National Water Carrier Project)	2100
National Railway Network Project (Phase I Aqaba-Amman)	1900
Jordanian-Iraqi Electrical Interconnection Project	30
Jordanian-Saudi Arabia Electrical Interconnection Project	39
Increasing the capacity of the electrical interconnection line between Jordan and Egypt to 1100 MW	40
Establishment of 15 public schools through the use of PPP approach (DBFOMT) model	46
Amman - Zarqa Bus Rapid Transit Project (BRT)	140
Construction of cargo and passenger yards for the new King Hussein Crossing Bridge	225
Development and renovation of Aqaba Container Terminal	300
Toll Road projects	400
<b>Total:</b>	<b>9570</b>

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

## Promising Opportunities and Potentials

### in the Industrial Sectors

<b>Chemical Products</b>	<ul style="list-style-type: none"> <li>• Downstream Processing Plants for phosphate, potash, and bromine</li> <li>• Chemical Products Industrial Park</li> </ul>
<b>Food Products</b>	<ul style="list-style-type: none"> <li>• Processing Plants for Vegetables and fruits</li> <li>• Industrial complex for Arabic snacks and local food products</li> <li>• food products Exhibition Arena</li> </ul>
<b>Engineered Products</b>	<ul style="list-style-type: none"> <li>• Manufacturing electrical supplies for construction and stone masonry systems</li> <li>• Assembly of electric vehicles (EV Assembly Plant)</li> </ul>
<b>Pharmaceuticals</b>	<ul style="list-style-type: none"> <li>• Quality pharmaceutical industries (Export Hub)</li> <li>• API Pharmaceutical Industries</li> <li>• Pharmaceutical Research and Development Center</li> </ul>
<b>Textile Products</b>	<ul style="list-style-type: none"> <li>• Clothing and fashion production for export purposes</li> <li>• Fabric Mills</li> </ul>
<b>Mining</b>	<ul style="list-style-type: none"> <li>• Metallic minerals mining (rare earth metals, Uranium, zirconium)</li> <li>• Phosphate and potash mining</li> <li>• Mining- Specific Logistics Infrastructure to facilitate mining operations</li> </ul>
<b>Agriculture and Food Security</b>	<ul style="list-style-type: none"> <li>• Smart Agricultural CEA Farms for Fruits and Vegetables</li> <li>• RAS-Based Fish Farms</li> <li>• Establishment of veterinary hospital</li> <li>• Industrial-agricultural Park</li> <li>• Agricultural industries complex in the south Jordan Valley</li> </ul>

## Promising Opportunities and Potentials

### in Future Services

<b>ICT Services</b>	• Providing online and digital government services
	• Advanced research and development centers/ innovation Center
	• 5G infrastructure
<b>Film</b>	• International feature and local film production projects
	• Post- Production Studio and a Film Academy
<b>Transport</b>	• National Railway Network
	• Warehousing and distribution centers
	• Electric vehicle charging stations network
	• Toll roads projects
	• Smart mobility solutions
	• Developing services at the border crossings
<b>E-gaming</b>	• Design and development of video games
	• E-sports websites
	• Video Games Academy
<b>Financial Services</b>	• Specialized financing institutions to finance small, medium and micro enterprises
	• Locally- Based Reinsurance service providers Infrastructure projects for enhancement of digital financial services
	• Infrastructure projects for enhancement of digital financial services
<b>Healthcare</b>	• Various health care facilities and the medical city conScept
	• Specialization Hubs in the north, center and south (PPPs or private investments)
<b>Creative and Design Services</b>	• Consumer Product and industrial design studios
	• Apparel design studios
	• Creative Industries Hub
<b>Trade</b>	• E-commerce platforms
	• Regional trading businesses (between Jordan and neighboring countries)
	• Establishment and development of the exhibition grounds (Corridor Abdoun)

## Promising Opportunities and Potentials

### in Service Sectors

<b>Early Childhood and Education</b>	• Daycare centers
	• Children Edutainment Hub
<b>Energy</b>	• Energy storage systems
	• Green Ammonia and Green Hydrogen plant
	• Smart metering solutions
	• Working on the development of the Risha field
<b>Water</b>	• National water desalination plants
	• Water DSM Equipment and Solution Company
<b>Higher Education</b>	• Specialized colleges
	• International university
	• Online education courses platforms
	• Medical University
<b>TEVT</b>	• Vocational training institutes
	• Specialized technical programs
<b>Tourism</b>	• Small hotels in tourism locations (Boutique Hotels).
	• Tourism projects of a cultural and natural heritage nature
	• Projects in religious tourist sites
	• Agri and Culinary, and environmental tourism projects
	• Digital tourism experiences productions
	• Adventure tourism and Wellbeing and Spa Projects

## Initiatives and Priorities of the Industrial Sector

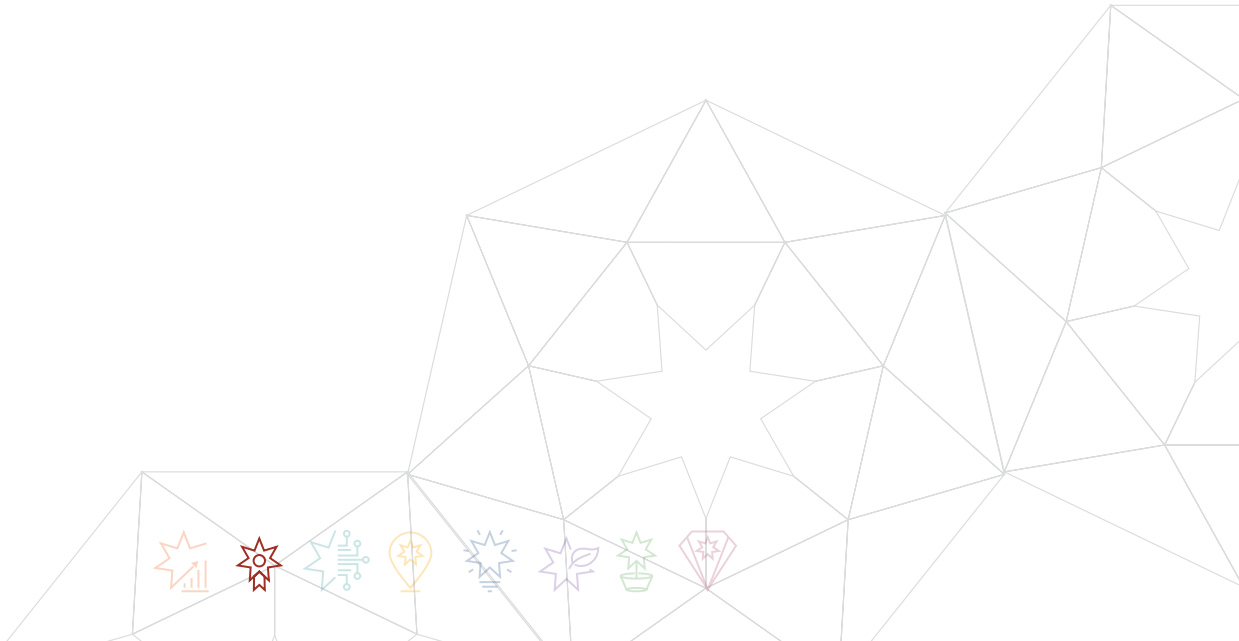

Initiative	2023	2024	2025	Owner
Enhance the competitiveness of domestic industries	Developing a comprehensive industrial policy to promote sustainable competitiveness and commencing its implementation			Ministry of Industry, Trade and Supply
	Industrial Support Fund			Ministry of Industry, Trade and Supply
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Increase the volume of national exports of goods and services	Developing and implementing the National Export Strategy (2023-2025)			Ministry of Industry, Trade and Supply
	Developing and launching the Local Product Promotion Policy (Made in Jordan)			Ministry of Industry, Trade and Supply
	Building a database of various manufacturing sectors and developing their related strategies			Ministry of Industry, Trade and Supply
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Support entrepreneurship and small and medium-sized enterprises (SMEs)	Facilitating and mainstreaming registration and licensing procedures, especially for small enterprises and entrepreneurs			Ministry of Investment
	Defining incentives for small and medium-sized enterprises (SMEs) - campaigns 2023			Ministry of Industry, Trade and Supply
	Designing and implementing specialized training programs for entrepreneurs in the field of manufacturing to help them manage their projects.			Ministry of Industry, Trade and Supply
	Project to support small and medium-sized enterprises to enhance participation in government tenders			Ministry of Industry, Trade and Supply
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Environmental compliance in manufacturing	Developing standards for circular economy practices in industrial activities and focusing on environmental industrial clusters			Ministry of Industry, Trade and Supply
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				

Initiative	2023	2024	2025	Owner
Market and promote food manufacturing	Preparing and implementing a campaign to market and promote Jordan food industries both domestically and internationally (within "Made in Jordan" Program)			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals  Women Empowerment Medium Impact 			
Enhance supply chains for plant-based food manufacturing and enhance quality and specifications of Jordan food products	Crop allocation in the food manufacturing			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals  Women Empowerment Medium Impact 			
Increase the competitiveness and share of Jordan pharmaceuticals in the domestic and foreign market	Developing and implementing a plan to promote Jordan pharmaceutical products in the domestic and foreign market			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals  Women Empowerment Medium Impact 			
Facilitate search and access to intellectual property data	Providing intellectual property data for pharmaceutical manufacturing			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals  Women Empowerment Medium Impact 			
Develop the productivity of the pharmaceutical sector and enhance cost competitiveness	Improving productivity and cost competitiveness in the pharmaceutical sector			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals  Women Empowerment Medium Impact 			
Improve quality of pharmaceutical products and academic industrial interconnection	Developing and implementing research and development strategy for pharmaceutical sector			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals  Women Empowerment Medium Impact 			

Initiative	2023	2024	2025	Owner
Enhance and improve productivity of the engineering sector and its contribution to value chains	Supporting research, development, and innovation and leveraging Fourth Industrial Revolution technologies to provide engineering solutions for high-capacity products and rapidly growing engineering products. Promoting the use of Fourth Industrial Revolution technologies and fields in manufacturing			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Enhancing the competitiveness of food manufacturing and increasing exports	Simplification of food licensing procedures			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Enhance competitiveness of the textile sector	Integrating vocational skills within schools, industrial and vocational training programs and creating an empowering and stimulating environment			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Access to foreign markets through new free trade agreements	Considering the evaluation of free trade agreements and expanding access to external markets			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				

Initiative	2023	2024	2025	Owner
Enhance the competitiveness of domestic industries	Implementing the outputs of the comprehensive industrial policy to enhance a sustainable competitiveness			Ministry of Industry, Trade and Supply
	Industrial Support Fund			Ministry of Industry, Trade and Supply

► Sustainable Development Goals  

Increase the volume of national exports of goods and services	Developing and launching a policy for the continued promotion of local products (Made in Jordan)			Ministry of Industry, Trade and Supply
	Continuing to update the database of various manufacturing sectors and developing strategies for it (Industrial Observatory)			Ministry of Industry, Trade and Supply

► Sustainable Development Goals  

Support entrepreneurship and small and medium-sized enterprises (SMEs)	Defining incentives for small and medium-sized enterprises (SMEs) - campaigns (2024)			Ministry of Industry, Trade and Supply
	Further designing and implementing specialized training programs for entrepreneurs in the field of manufacturing to help them manage their projects.			Ministry of Industry, Trade and Supply
	Launching the Entrepreneurship Award to recognize the achievements of entrepreneurs and their contribution to the manufacturing sector			Ministry of Industry, Trade and Supply

► Sustainable Development Goals  

Initiative	2023	2024	2025	Owner
Environmental compliance in manufacturing	Applying circular economy practices in industrial activities and focusing on environmental industrial clusters			Ministry of Industry, Trade and Supply
	Preparation and implementation of the green marketing program for industrial products			Ministry of Industry, Trade and Supply
	Supporting and promoting the intelligent design concept			Ministry of Industry, Trade and Supply
	Supporting the establishment of local recycling companies and the legislative environment governing this process			Ministry of Industry, Trade and Supply
	Considering Sustainable Manufacturing Certifications and providing incentives for sustainable production certified companies or the ones applying environmental practices in manufacturing and in their administrative operations			Ministry of Industry, Trade and Supply

► Sustainable Development Goals  Women Empowerment Medium Impact 

Enhance the competitiveness of food manufacturing and increase exports	Development of a national strategy and roadmap to enhance food manufacturing and the national food traceability system			Ministry of Industry, Trade and Supply
	Studying the reduction of the informal economy in the food industries sector			Ministry of Industry, Trade and Supply
	Building the capacity of food manufacturing workers through a skills development programme			Ministry of Industry, Trade and Supply

► Sustainable Development Goals  Women Empowerment Medium Impact 

Initiative	2023	2024	2025	Owner
Market and promote food manufacturing	Further implementing a campaign to market and promote Jordan food industries both domestically and internationally (within "Made in Jordan" Program)			Ministry of Industry, Trade and Supply
	Expanding the services of the National Packaging Center and increasing the number of companies benefiting from these services			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals</p> 	<p>Women Empowerment Medium Impact</p> 			
Enhance supply chains for plant-based food manufacturing and enhance quality and specifications of Jordan food products	Crop allocation in the food manufacturing			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals</p> 	<p>Women Empowerment Medium Impact</p> 			
Increase the competitiveness and share of Jordan pharmaceuticals in the domestic and foreign market	Implementing a plan to promote Jordan pharmaceutical products in the domestic and foreign market			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals</p> 	<p>Women Empowerment Medium Impact</p> 			
Facilitate search and access to intellectual property data	Providing intellectual property data for pharmaceutical manufacturing			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals</p> 	<p>Women Empowerment Medium Impact</p> 			
Stimulate contract production of biologics	Facilitating and encouraging contract production of biologics, biotech drugs, and biosimilars			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals</p> 	<p>Women Empowerment Medium Impact</p> 			

Initiative	2023	2024	2025	Owner
Develop the productivity of the pharmaceutical sector and enhance cost competitiveness	Improving productivity and cost competitiveness in the pharmaceutical sector			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Improve the quality of pharmaceutical products and academic-industrial interconnection	Implementing the outputs of research and development strategy for pharmaceutical manufacturing			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Enhance and improve Productivity of the engineering sector and its contribution to value chains	Preparation of a national strategy and roadmap to enhance the local and international engineering industries sector			Ministry of Industry, Trade and Supply
	Supporting research, development, and innovation and leveraging Fourth Industrial Revolution technologies to provide engineering solutions for high-capacity products and rapidly growing engineering products. Promoting the use of Fourth Industrial Revolution technologies and fields in manufacturing			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Enhance competitiveness of the textile sector	Integrating vocational skills within schools, industrial and vocational training programs and creating an empowering and stimulating environment			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				

Initiative	2023	2024	2025	Owner
Access to foreign markets through new free trade agreements	Implementing the recommendations of the assessment of free trade agreements and expanding its use			Ministry of Industry, Trade and Supply

Initiative	2023	2024	2025	Owner
Enhance the competitiveness of domestic industries	Further implementing the comprehensive industrial policy to promote sustainable competitiveness			Ministry of Industry, Trade and Supply
	Industrial Support Fund			Ministry of Industry, Trade and Supply

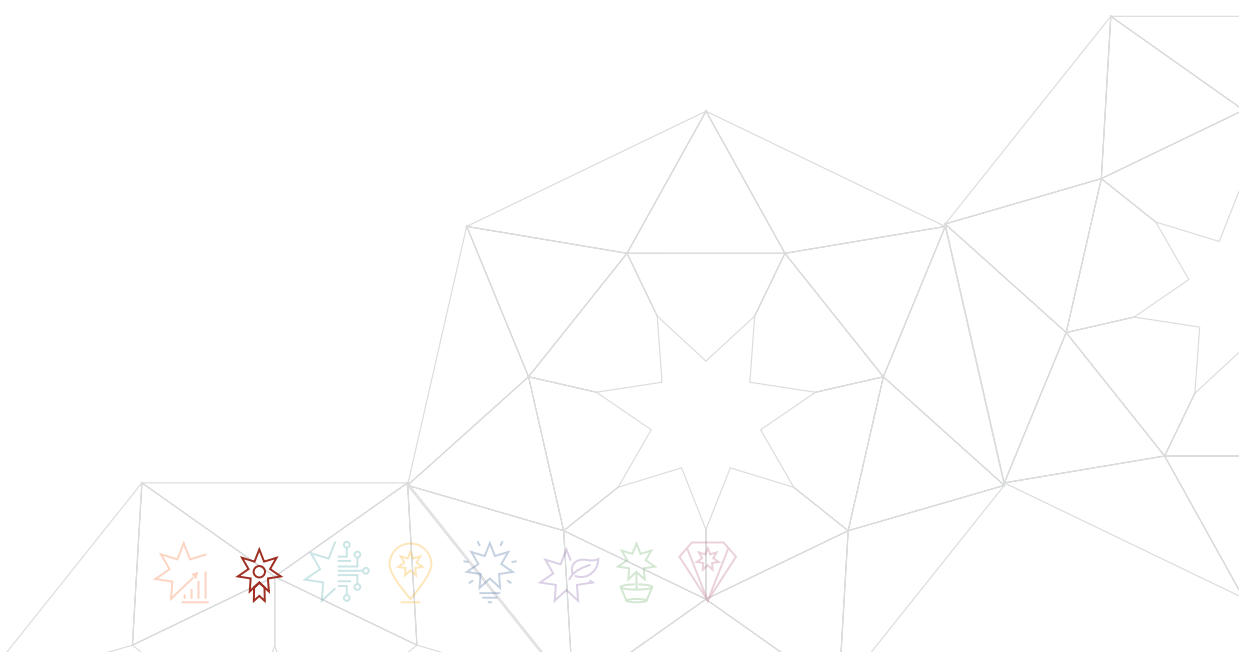

► Sustainable Development Goals  Women Empowerment Medium Impact 

Increase the volume of national exports of goods and services	Further promoting local products (Made in Jordan)			Ministry of Industry, Trade and Supply
---	---	--	--	--

► Sustainable Development Goals  Women Empowerment Medium Impact 

Support entrepreneurship and small and medium-sized enterprises (SMEs)	Launching an entrepreneurship award to recognize the achievements of entrepreneurs and their contributions to the manufacturing sector			Ministry of Industry, Trade and Supply
	implementing specialized training programs for entrepreneurs in the field of manufacturing to help them manage their projects.			Ministry of Industry, Trade and Supply

## Initiatives and Priorities of the Mining Sector

Initiative	2023	2024	2025	Owner
Create a regulatory framework for natural resources	Create an organizational structure for managing geological surveys according to the best international standards			Ministry of Energy and Mineral Resources
<p>▶ Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Promote investment in national mineral resources	Developing a national mining strategy and starting the implementation			Ministry of Energy and Mineral Resources
	Revising, amending and approving the Natural Resources Law No. (19) of 2018 and its regulations			Ministry of Energy and Mineral Resources
	Conducting a study to identify constraints in the mining sector			Ministry of Energy and Mineral Resources
	Creating a digital platform for investment opportunities in the mining sector			Ministry of Energy and Mineral Resources
	Extracting lithium from the DeadSea water			Ministry of Energy and Mineral Resources
	Exploration and extraction of rare earth elements in the Debbedeb area			Ministry of Energy and Mineral Resources
	Exploration and mining of gold ore in the Jabal Mubarak area			Ministry of Energy and Mineral Resources
	Exploration and mining of gold ore in the Abu Khashaibah area			Ministry of Energy and Mineral Resources
	Exploration and mining of lithium ore in the Finan area			Ministry of Energy and Mineral Resources

Initiative	2023	2024	2025	Owner
Promote investment in national mineral resources	Exploration and mining of copper ore in the Dhana region			Ministry of Energy and Mineral Resources
	Exploration and mining of copper ore in the Wadi Malqa area			Ministry of Energy and Mineral Resources
	Exploration and mining of rock phosphate in the Lisan area - DeadSea			Ministry of Energy and Mineral Resources
	Exploration and mining of phosphate ore in the Risha area by the Altasneem Omani Company			Ministry of Energy and Mineral Resources
	Exploration and mining of copper ore in the Abu Khashaibah area			Ministry of Energy and Mineral Resources
	Exploration and mining of phosphate ore in the Risha area by the Arab Mining Company			Ministry of Energy and Mineral Resources
	Upgrading silica sands			Ministry of Energy and Mineral Resources
	Studying basalt rocks in the Harat al-Shaqq area			Ministry of Energy and Mineral Resources

Sustainable Development Goals

Women Empowerment  
Medium Impact

Initiative	2023	2024	2025	Owner
Create a regulatory framework for natural resources	Establishing an institutional organizational (an independent body for conducting) structure responsible for geological surveying in accordance with best international standards.			Ministry of Energy and Mineral Resources

Promote investment in national mineral resources	Revising, amending and approving the Natural Resources Law No. (19) of 2018 and its regulations	Ministry of Energy and Mineral Resources
	Extracting lithium from the Dead Sea water	Ministry of Energy and Mineral Resources

## Initiatives and Priorities of the Agriculture and Food Security Sector

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Developing and implementing an action plan to improve Jordan's ranking in the Global Food Security Index			Ministry of Agriculture
Strengthen the food security system	Activating the work of the Higher Food Security Council			Ministry of Agriculture
	Creating a comprehensive national database for food security *			Ministry of Agriculture
	Preparation of designs, tender documents, tendering, and referral for the expansion of refrigerated warehouses at the Al-Jweideh Silo Complex			Ministry of Industry, Trade and Supply

► Sustainable Development Goals   Women Empowerment Medium Impact 

Develop and streamline regulatory procedures of the agriculture sector	Amending the instructions for licensing agricultural, plant and livestock activities in line with the Control Law			Ministry of Agriculture
	Amending the instructions for registering pesticides, fertilizers, veterinary medicines and vaccines			Ministry of Agriculture
	Issuing instructions related to inspection and control of agricultural activities			Ministry of Agriculture
	Creating a digital system for registering agricultural holdings			Ministry of Agriculture

► Sustainable Development Goals   Women Empowerment Medium Impact 

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Expand agricultural financing programs	Developing the financing services and procedures at the Agricultural Credit Corporation			Agricultural Credit Corporation
	Project for the development and utilization of irrigated (surface and sub-surface) agricultural lands			Agricultural Credit Corporation
	Implementing Water Resources Development and Use of Modern Technologies Project			Agricultural Credit Corporation
	Stimulus package for growth in the agricultural sector (agricultural companies, agricultural associations)			Agricultural Credit Corporation
	Amending the Agricultural Risk Fund Law to expand the coverage to the largest number of farmers			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact

Expand the support to agriculture industries dependent on local input	Establishing the agricultural industries park in the southern Jordan Valley			Ministry of Agriculture
	Stimulating the establishment of agricultural industries dependent on local agricultural products in the industrial cities			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact

Develop the agriculture sector practices and support services	Implementation of a maintenance and lining program for irrigation canals			Ministry of Agriculture
	Using rainwater harvesting techniques in agriculture and rehabilitating desert pastures			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Enhance the strategic stocks of grains	Expanding the scope of work of the National Seed Bank (NSB) *			Ministry of Agriculture
	Preparing designs and tender documents, tendering and awarding of the project to increase the storage capacity of grain containers in Al-Ghabawi			Ministry of Industry, Trade and Supply
	Preparing designs and tender documents and awarding the project to construct new containers in the Qatraneh area			Ministry of Industry, Trade and Supply
	Agricultural investment of the state lands/ Al-Hammad and Al-Sarhan			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact 

Enhance agricultural research and development and expand the use of modern technology and techniques	Program for intensifying the use of modern agricultural technology in agricultural production fields			Agricultural Credit Corporation
	Creating leading business models to use modern agricultural technology (Tannoor Dam and Mujib Dam)			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact 

Improve Agri education and vocational training services	Developing and implementing the agricultural pattern based on export need through coalitions to develop supply chains for agricultural industries and contract farming/agricultural pattern			Ministry of Agriculture
---	---	--	--	-------------------------

► Sustainable Development Goals  Women Empowerment Medium Impact 

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Develop the agricultural marketing ecosystem	Program for financing projects to develop value chains for agricultural products, including manufacturing, storage, and packaging			Agricultural Credit Corporation
	Program to incentivize the use of renewable energy in agricultural projects			Agricultural Credit Corporation
	Establishment of a permanent exhibition for rural and Bedouin products in Amman			Ministry of Agriculture
	Establishment of a permanent exhibition for rural and Bedouin products in Irbid			Ministry of Agriculture
	Amending legislations for tracking agricultural products in alignment with international practices			Ministry of Agriculture
	Establishment of a digital system for tracking agricultural and food products			Ministry of Agriculture

► Sustainable Development Goals   Women Empowerment Medium Impact 

Develop the work of cooperative societies and unions

Reviewing and amending legislation to enhance the economic and social role of Jordan Cooperative Corporation  
Ministry of Agriculture

► Sustainable Development Goals   Women Empowerment Medium Impact 

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Preparation and implementation of an action plan to improve Jordan's ranking in the Global Food Security Index			Ministry of Agriculture

	Simplifying procedures for registering intellectual property rights in the higher education and scientific research sector			Ministry of Higher Education and Scientific Research
<p>▶ Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Enhancing Jordan's status as a hub for marine science and innovation	The Marine Research Center and Aquarium			Special economic zone authority

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Develop the scientific research ecosystem	Continuing the Talent Support Program in Research and Development			Ministry of Higher Education and Scientific Research
	Supporting established innovation centers in higher education institutions and other entities, ensuring the provision of technical and financial support for locally conducted research through the Scientific Research Support Fund			Ministry of Higher Education and Scientific Research
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Strengthen intellectual property enforcement and protection	Further implementing a program to stimulate and promote intellectual property			Ministry of Higher Education and Scientific Research
	Reviewing and amending existing intellectual property laws and ensuring their alignment with the National Innovation Strategy and with best International practices			Ministry of Higher Education and Scientific Research
	Simplifying procedures for registering intellectual property rights in the higher education and scientific research sector			Ministry of Higher Education and Scientific Research
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Enhancing Jordan's status as a hub for marine science and innovation	The Marine Research Center and Aquarium			Special economic zone authority

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

## Initiatives and Priorities of the Energy Sector

Initiative	2023	2024	2025	Owner
Transition toward clean energy	Modernising the Energy Sector Strategy			Ministry of Energy and Mineral Resources
	Developing a roadmap for hydrogen use and production			Ministry of Energy and Mineral Resources
	Studying the transition toward electric transportation			Ministry of Energy and Mineral Resources
	Completing the economic feasibility studies for the green hydrogen and green ammonia production project			Ministry of Energy and Mineral Resources
	The project of Green Ethanol Production from Hydrogen (AP Moller)			Ministry of Energy and Mineral Resources
	Following up on the implementation of the memorandum of understanding for hydrogen with Qawar Company in the field of hydrogen			Ministry of Energy and Mineral Resources
	Following up on the implementation of the Memorandum of Understanding with (Acwa power) company in the hydrogen sector			Ministry of Energy and Mineral Resources
	Following up on the implementation of the Memorandum of Understanding with the Jordanian (Catalyst) company in the field of hydrogen			Ministry of Energy and Mineral Resources
	Following up on the implementation of the Memorandum of Understanding with (Mass Group) Company in the field of hydrogen			Ministry of Energy and Mineral Resources
	Following up on the implementation of the Memorandum of Understanding with (Ocor Energy), the Indian company, in the field of hydrogen			Ministry of Energy and Mineral Resources
	Following up on the implementation of the Memorandum of Understanding with the Jordan Green Ammonia Company in the field of hydrogen			Ministry of Energy and Mineral Resources
	Following the implementation of the memorandum of understanding with Philadelphia Solar Energy Company in the field of hydrogen			Ministry of Energy and Mineral Resources
	Following up on the execution of the memorandum of understanding with Emirates Masdar Company in the field of hydrogen			Ministry of Energy and Mineral Resources
	Following up on the implementation of the memorandum of understanding with the German Enertrag company in the field of hydrogen			Ministry of Energy and Mineral Resources
Following up on the implementation of the memorandum of understanding with the Irish (H2 Global) company and Emirate (Amaren-co) company in the field of hydrogen			Ministry of Energy and Mineral Resources	

Initiative	2023	2024	2025	Owner
Transition toward clean energy	Following up on the implementation of the memorandum of understanding with Korean (KEPCO) and Saudi Arabian Xenel companies in the field of hydrogen			Ministry of Energy and Mineral Resources
	Sustainable Development Goals			
Develop the legislative environment for the energy sector	Reviewing and amending the General Electricity Law No. (64) of 2002			Ministry of Energy and Mineral Resources
	Reviewing and amending the Renewable Energy and Energy Efficiency Law and its Regulations No. (13) of 2012			Ministry of Energy and Mineral Resources
	Drafting and approving hydrogen-related laws and regulations			Ministry of Energy and Mineral Resources
	Sustainable Development Goals			
Enhance the efficiency of the electrical system	Adopting policies to reduce the cost of the electrical system, such as time-related tariffs, and increasing storage capacities			Ministry of Energy and Mineral Resources
	Sustainable Development Goals			
Enhance the environmental sustainability of the energy sector	Developing a project for the design, supply, installation, operation, and acceptance of solar photovoltaic systems solely for operating surface water pumps in the agricultural sector, replacing a total of 500 surface water pumps			Ministry of environment
	Supporting energy efficiency in medium and small industrial enterprises- (conducting energy audit studies)			Ministry of Energy and Mineral Resources
	Installing solar heater systems for poor families			Ministry of Energy and Mineral Resources
	Installing solar heater systems in the household sector			Ministry of Energy and Mineral Resources
	Installing solar cell systems for municipalities			Ministry of Energy and Mineral Resources
	A study to determine the optimal options for converting waste into energy			Ministry of Energy and Mineral Resources
	Sustainable Development Goals			
Reduce energy supply costs	The financial reform plan for the electricity sector			Ministry of Energy and Mineral Resources

Initiative	2023	2024	2025	Owner
Reduce energy supply costs	Gradual transition toward smart grids			Ministry of Energy and Mineral Resources
	Reviewing the pricing mechanism of petroleum derivatives to shift from fixed price to price thresholds			Ministry of Energy and Mineral Resources
	Developing Sheikh Sabah Port - Natural Gas - Establishing an Onshore Jetty Regasification Unit			Aqaba Development Corporation (ADC)
	Supplying industrial cities with natural gas (Al-Muwaqqar Industrial City, Al-Rawdah Industrial City, and the industrial city planned to be established in Al-Quweira)			Ministry of Energy and Mineral Resources
	Studying electrical energy storage options			Ministry of Energy and Mineral Resources
	Renting a Floating Storage Unit (FSU) instead of the existing Floating Storage and Regasification Unit (FSRU)			Ministry of Energy and Mineral Resources

Energy infrastructure development	The Jordanian-Iraqi interconnection project / the implementation of the Jordanian-Iraqi interconnection project by the Jordanian side			Ministry of Energy and Mineral Resources
	The Jordanian-Iraqi Connection Project / Follow-up on the implementation of the Jordanian-Iraqi connection with the Iraqi side			Ministry of Energy and Mineral Resources
	Implementing a project to increase the capacity of the electrical interconnection line between Jordan and Egypt			Ministry of Energy and Mineral Resources
	Conducting studies and selecting the best model for the Jordanian-Saudi interconnection project			Ministry of Energy and Mineral Resources
	Completing the installation of smart meters on distribution networks			Ministry of Energy and Mineral Resources
	Implementing a project to connect industrial cities and areas with natural gas networks			Ministry of Energy and Mineral Resources

Initiative	2023	2024	2025	Owner
Energy infrastructure development	Developing the National Monitoring and Control Center by establishing a control building north of Amman and renovating the current control system			Ministry of Energy and Mineral Resources
	Developing laws and regulations governing investment in electric charging stations			Ministry of Energy and Mineral Resources
	Conducting a study to link Jordan electrically with the countries of the Middle East, North Africa and Europe			Ministry of Energy and Mineral Resources
	Developing the oil port /Phase 3			Aqaba Development Corporation (ADC)
	Studying the renewable energy and green energy generating capacity			Ministry of Energy and Mineral Resources
	Completing Sarhan field development			Ministry of Energy and Mineral Resources
	Completing Hamza field development			Ministry of Energy and Mineral Resources
	Continuing work on the development of the Al-Jafr area			Ministry of Energy and Mineral Resources
	Launching exploration operations and conducting cost-benefit analysis for reserves, then converting them into investment opportunities			Ministry of Energy and Mineral Resources
	Exploration and drilling for oil in the Azraq area			Ministry of Energy and Mineral Resources
Developing a study for the development of the electrical transmission network, including from transmission stations and lines			Ministry of Energy and Mineral Resources	
Market investment opportunities in the energy sector	Sustainable Development Goals  Women Empowerment Indirect Impact 			Ministry of Energy and Mineral Resources
	Sustainable Development Goals  Women Empowerment Indirect Impact 			

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Enhancing financial sustainability and cost of healthcare services	Expanding the use of alternative energy systems in the facilities of the Ministry of Health.			Ministry of health

▶ Sustainable Development Goals  Women Empowerment Indirect Impact 

Initiative	2023	2024	2025	Owner
Transition toward clean energy		Updating the energy sector strategy		Ministry of Energy and Mineral Resources
		Completing the economic feasibility studies for the green hydrogen and green ammonia production project		Ministry of Energy and Mineral Resources
		Identifying common infrastructure for green hydrogen projects		Ministry of Energy and Mineral Resources
		Following up on the implementation of the memorandum of understanding for hydrogen with Qawar Company in the field of hydrogen		Ministry of Energy and Mineral Resources
		Following up on the implementation of the Memorandum of Understanding with (Acwa power) company in the hydrogen sector		Ministry of Energy and Mineral Resources
		Following up on the implementation of the Memorandum of Understanding with the Jordanian (Catalyst) company in the field of hydrogen		Ministry of Energy and Mineral Resources
		Following up on the implementation of the Memorandum of Understanding with (Mass Group) Company in the field of hydrogen		Ministry of Energy and Mineral Resources
		Following up on the implementation of the Memorandum of Understanding with (Oci Energy), the Indian company, in the field of hydrogen		Ministry of Energy and Mineral Resources
		Following up on the implementation of the Memorandum of Understanding with the Jordan Green Ammonia Company in the field of hydrogen		Ministry of Energy and Mineral Resources
		Following the implementation of the memorandum of understanding with Philadelphia Solar Energy Company in the field of hydrogen		Ministry of Energy and Mineral Resources
		Following up on the execution of the memorandum of understanding with Emirates Masdar Company in the field of hydrogen		Ministry of Energy and Mineral Resources
		Following up on the implementation of the memorandum of understanding with the German Enertrag company in the field of hydrogen		Ministry of Energy and Mineral Resources

Initiative	2023	2024	2025	Owner
Transition toward clean energy	Following up on the implementation of the memorandum of understanding with the Irish (H2 Global) company and Emirate (Amaren-co) company in the field of hydrogen			Ministry of Energy and Mineral Resources
	Following up on the implementation of the memorandum of understanding with Korean (KEPCO) and Saudi Arabian Xenel companies in the field of hydrogen			Ministry of Energy and Mineral Resources
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Enhance the efficiency of the electrical system	Adopting policies to reduce the cost of the electrical system, such as time-related tariffs, and increasing storage capacities			Ministry of Energy and Mineral Resources
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Enhance the environmental sustainability of the energy sector	Supporting energy efficiency in medium and small industrial enterprises- (conducting energy audit studies)			Ministry of Energy and Mineral Resources
	Installing solar heater systems in the household sector			Ministry of Energy and Mineral Resources
	Installation of 500 photovoltaic systems for the agricultural sector.			Ministry of environment
	Installing solar cell systems for municipalities			Ministry of Energy and Mineral Resources
	Installation of solar water heaters for low-income households			Ministry of Energy and Mineral Resources
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Reduce energy supply costs	The financial reform plan for the electricity sector			Ministry of Energy and Mineral Resources
	Study of options for electrical energy storage			Ministry of Energy and Mineral Resources
	Reviewing the pricing mechanism of petroleum derivatives to transition from fixed pricing to price ceiling determination			Ministry of Energy and Mineral Resources
	Developing Sheikh Sabah Port - Natural Gas - Establishing an Onshore Jetty Regasification Unit			Aqaba Development Corporation (ADC)

Initiative	2023	2024	2025	Owner
Reduce energy supply costs	Renting a Floating Storage Unit (FSU) instead of the existing Floating Storage and Regasification Unit (FSRU)			Ministry of Energy and Mineral Resources
	Project for supplying industrial cities with natural gas (Al-Muwaqqar Industrial City, Al-Rawdah Industrial City, and the industrial city planned to be established in Al-Quweira)			Ministry of Energy and Mineral Resources
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Energy infrastructure development	The Jordanian-Iraqi interconnection project / the implementation of the Jordanian-Iraqi interconnection project by the Jordanian side			Ministry of Energy and Mineral Resources
	The Jordanian-Iraqi Connection Project / Follow-up on the implementation of the Jordanian-Iraqi connection with the Iraqi side			Ministry of Energy and Mineral Resources
	Implementing a project to increase the capacity of the electrical interconnection line between Jordan and Egypt			Ministry of Energy and Mineral Resources
	Completing studies and selecting the best model for the Jordanian-Saudi interconnection project			Ministry of Energy and Mineral Resources
	The fourth expansion project for Jordan Petroleum Refinery Company			Jordan Petroleum Refinery Company
	Completing the installation of smart meters on distribution networks			Ministry of Energy and Mineral Resources
	Completing the project of connecting industrial cities and areas with natural gas networks			Ministry of Energy and Mineral Resources
	Developing the National Monitoring and Control Center by establishing a control building north of Amman and renovating the current control system			Ministry of Energy and Mineral Resources
	Developing laws and regulations governing investment in electric charging stations			Ministry of Energy and Mineral Resources
Conducting a study to link Jordan electrically with the countries of the Middle East, North Africa and Europe			Ministry of Energy and Mineral Resources

	Studying the electrical connection of Jordan with Middle Eastern, North African, and European countries.			Ministry of Energy and Mineral Resources
	Developing the oil port /Phase 3			Aqaba Development Corporation (ADC)
	Initiating exploration operations and conducting cost-benefit analysis for reserves, then converting them into investment opportunities			Ministry of Energy and Mineral Resources
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Enhancing financial sustainability and cost of healthcare services	Expanding the use of alternative energy systems in the facilities of the Ministry of Health			Ministry of health
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				

## Initiatives and Priorities of the Water Sector

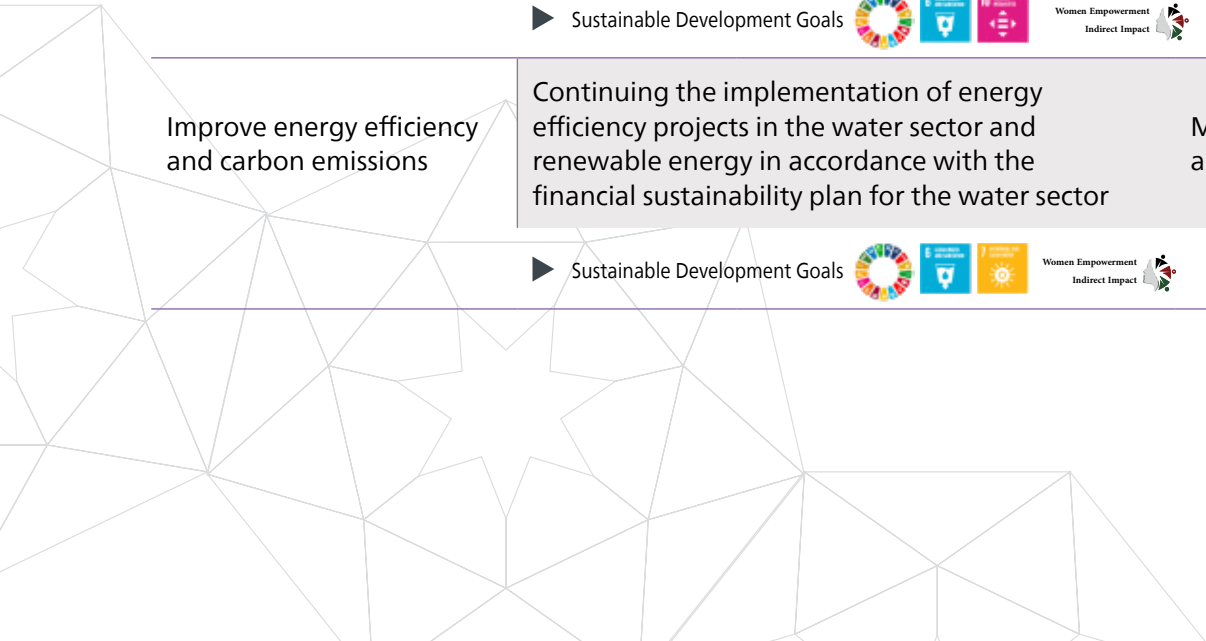

Initiative	2023	2024	2025	Owner
Reduce Non Revenue Water (NRW)	Implementing the non-revenue water (NRW) reduction strategy for the year 2023, aiming to reduce by 2% according to the financial sustainability plan			Ministry of Water and Irrigation / Water Authority
	 Sustainable Development Goals			
Enhance water supply	Implementing water distribution networks and procuring and transporting water from its sources			Ministry of Water and Irrigation
	Implementation of the dams program and finding new sources of water to increase the strategic water reserve			Ministry of Water and Irrigation
	Implementation of the desalination and water transfer project (National Carrier)			Ministry of Water and Irrigation
	 Sustainable Development Goals			
Governance of the water sector and enforcement of water laws and regulations	Restructuring the water sector and its institutions and establishing a regulatory authority through the Water Sector Governance project			Ministry of Water and Irrigation
	Developing a plan for the financial sustainability of the water sector and implementing its components			Ministry of Water and Irrigation
	Eliminating abuse of transmission lines and distribution networks			Ministry of Water and Irrigation
	Amending the Groundwater Monitoring Regulation			Ministry of Water and Irrigation
	Amending Water Resources Protection Instructions			Ministry of Water and Irrigation
	Modifying and approving the foundations for drilling saline groundwater wells in Jordan Valley for 2022			Ministry of Water and Irrigation
	Updating the investment program and enhancing the project monitoring tool in the capital investment plan through the Water Sector Governance project			Ministry of Water and Irrigation
	Development of the water sector strategy 2023-2024, and updating water policies, and institutionalization of their implementation through the Water Governance project			Ministry of Water and Irrigation
	 Sustainable Development Goals			

Initiative	2023	2024	2025	Owner
Improve energy efficiency and carbon emissions	Implementing energy efficiency projects in the water and renewable energy sector in accordance with the financial sustainability plan for the water sector			Ministry of Water and Irrigation

▶ Sustainable Development Goals 
 Women Empowerment  
 Indirect Impact

Initiative	2023	2024	2025	Owner
Reduce NRW	Implementing the non-revenue water (NRW) reduction strategy for the year 2024, aiming to reduce by 2% according to the financial sustainability plan			Ministry of Water and Irrigation
▶ Sustainable Development Goals  Women Empowerment Indirect Impact 				
Enhance water supply	Implementing water distribution networks and procuring and transporting water from its sources			Ministry of Water and Irrigation
	Continuing the Implementation of the dams program and finding new sources of water to increase the strategic water reserve			Ministry of Water and Irrigation
	Implementation of the desalination and water transfer project (National Carrier)			Ministry of Water and Irrigation
▶ Sustainable Development Goals  Women Empowerment Indirect Impact 				
Governance of the water sector and enforcement of water laws and regulations	Continuing to update the investment program and enhancing the project monitoring tool in the capital investment plan through the Water Sector Governance project			Ministry of Water and Irrigation
	Development of the water sector strategy 2023-2024, and updating water policies, and institutionalization of their implementation through the Water Governance project			Ministry of Water and Irrigation
	Eliminating abuse of transmission lines and distribution networks			Ministry of Water and Irrigation
	Restructuring the water sector and its institutions, and establishing a regulatory body through the Water Sector Governance project			Ministry of Water and Irrigation
▶ Sustainable Development Goals  Women Empowerment Indirect Impact 				
Improve energy efficiency and carbon emissions	Continuing the implementation of energy efficiency projects in the water sector and renewable energy in accordance with the financial sustainability plan for the water sector			Ministry of Water and Irrigation
▶ Sustainable Development Goals  Women Empowerment Indirect Impact 				

Initiative	2023	2024	2025	Owner
Reduce NRW	Implementing the non-revenue water (NRW) reduction strategy for the year 2025, aiming to reduce by 2% according to the financial sustainability plan			Ministry of Water and Irrigation
	▶ Sustainable Development Goals   Women Empowerment Indirect Impact 			
Enhance water supply	Implementing water distribution networks and procuring and transporting water from its sources			Ministry of Water and Irrigation
	Implementation of the dams program and finding new sources of water to increase the strategic water reserve			Ministry of Water and Irrigation
	Implementation of the desalination and water transfer project (National Carrier)			Ministry of Water and Irrigation
	▶ Sustainable Development Goals    Women Empowerment Indirect Impact 			
Governance of the water sector and enforcement of water laws and regulations	Eliminating abuse of transmission lines and distribution networks			Ministry of Water and Irrigation
	▶ Sustainable Development Goals    Women Empowerment Indirect Impact 			
Improve energy efficiency and carbon emissions	Further Implementing energy efficiency projects in the water and renewable energy sector in accordance with the financial sustainability plan for the water sector			Ministry of Water and Irrigation
	▶ Sustainable Development Goals    Women Empowerment Indirect Impact

## Initiatives and Priorities of the Green Economy Sector

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Preparation and implementation of an action plan to improve Jordan's ranking in the Environmental Performance Index			Ministry of Environment
Develop policies and stimulate the transition towards a green economy in the various economic and social sectors	Promoting green activities in industrial facilities GAIN			Ministry of Environment
	Upscaling Sustainable Cooling			Ministry of Environment
	National Waste Information and Monitoring System			Ministry of Environment
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Environmentally sound waste management	Commencing the selection of areas for waste recycling from the commercial sector			Greater Amman Municipality
	Commencing the implementation of the solid waste management and sorting from the source project			Greater Amman Municipality
	Implementing the Biological-mechanical Waste Treatment Project			Greater Amman Municipality
	Implementing the rehabilitation of Al Shaer Solid Waste Transfer Station			Greater Amman Municipality
	Further developing waste recycling			Ministry of Environment
	Activating the provisions of Waste Management Framework Law No. (16) of 2020			Ministry of Environment
	Environmentally sound management of mercury-containing waste and reduction of the use of mercury-containing products in Jordan			Ministry of Environment
	Developing a case study and designing sanitary landfill cells for Al-Akaidir landfill site			Ministry of Local Administration
	Further implementing the solid waste management project in Southern Jordan			Ministry of Local Administration
	Solid Waste Management in Southern Jordan			Ministry of Local Administration
Promoting and supporting local industries to manufacture components for renewable energy.			Ministry of Industry, Trade and Supply	
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Provide sustainable green jobs	Improving green infrastructure through labor-intensive green measures			Ministry of Environment
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>

## Initiatives and Priorities of the Urban Development Sector

Initiative	2023	2024	2025	Owner
Promote investment and partnership with the private sector in urban development projects	Preparing tender documents, tendering and awarding the tender for Amman Central Market Development Project			Greater Irbid Municipality
	constructing of the new Irbid Central Market			Greater Amman Municipality
	Constructing eco-friendly theme parks (Madapa)			
	Sustainable Development Goals			
Adopt "future city" standards and concepts	Conducting detailed studies for the new city			Prime Ministry
	Implementing the National Urban Policy			Ministry of Local Administration
	Creating the Urban Observatory Platform for Amman data (Urban Observatory) *			Greater Amman Municipality
	Conducting a study to connect the suburbs with the rapid bus routes			Greater Amman Municipality
	Conducting a study to create smart traffic solutions (Traffic Solutions)			Greater Amman Municipality
	Updating the masterplan for land use in Aqaba 2022-2040, in line with green growth and smart cities approach			Aseza
	Amending the Land Use Regulation No. 6 of 2007, as amended			Ministry of Local Administration
	Reviewing and amending the Urban and Rural Organization Law and its regulations in order to implement future cities criteria			Ministry of Local Administration
	Preparing a draft law to regulate the housing and real estate development sector			Housing and Urban Development Corporation (HUDC)
Establishing standards and principles for the creation of future cities			Housing and Urban Development Corporation (HUDC)	
	Sustainable Development Goals			
Promote the use of urban planning tools and its inclusion in the GIS system	Updating the Land Use Map 2007 at the national level			Ministry of Local Administration
	Preparing and approving the legal framework for managing and handling hazardous materials*			Ministry of Interior
	Sustainable Development Goals			

\* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Promote investment and partnership with the private sector in urban development projects	constructing of the new Irbid Central Market			Ministry of Local Administration
	Constructing eco-friendly theme parks (Irbid- Alsarhan)			Ministry of Local Administration
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Adopt "future city" standards and concepts	Implementing the National Urban Policy			Ministry of Local Administration
	Conducting detailed studies for the new city			Prime Ministry
	Conducting a study to create smart traffic solutions (Traffic Solutions)			Greater Amman Municipality
	Updating the masterplan for land use in Aqaba 2022-2040, in line with green growth and smart cities approach			Aseza
	Reviewing and amending the Urban and Rural Organization Law and its regulations in order to implement future cities criteria			Ministry of Local Administration
	Preparing a draft law to regulate the housing and real estate development sector			Housing and Urban Development Corporation (HUDC)
	Establishing standards and principles for the creation of future cities			Housing and Urban Development Corporation (HUDC)
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Promote the use of urban planning tools and its inclusion in GIS system	Complete updating the Land Use Map 2007 at the national level			Ministry of Local Administration
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				

Initiative	2023	2024	2025	Owner
<p>Promote investment and partnership with the private sector in urban development projects</p>	<p>constructing of the new Irbid Central Market</p>			<p>Ministry of Local Administration</p>
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
<p>Adopt “future city” standards and concepts</p>	<p>Completing detailed studies for the new city</p>			<p>Prime Ministry</p>
	<p>Further implementing the outputs of the plan to find Smart Traffic Solutions (Traffic Solutions)</p>			<p>Greater Amman Municipality</p>
	<p>Reviewing and amending the Urban and Rural Organization Law and its regulations in order to implement future cities criteria</p>			<p>Ministry of Local Administration</p>
	<p>Preparing a draft law to regulate the housing and real estate development sector</p>			<p>Housing and Urban Development Corporation (HUDC)</p>

## Mechanism for Monitoring Progress of the Executive Program

The Prime Ministry Delivery Unit (PMDU) will monitor the progress and delivery of the initiatives and priorities outlined in the Executive Program for the Economic Modernisation Vision. PMDU will provide all forms of technical support to overcome any obstacles that may arise during implementation.

### Monitoring Performance in the Implementation of the Economic Modernisation Vision

The process of monitoring the implementation of the of Economic Modernisation Vision shall be carried out along two parallel tracks to achieve the desired outcomes and goals.

1. Monitoring the delivery of the Vision Executive Program for all initiatives and priorities outlined in the Program via the PMDU follow-up and evaluation team. The progress of the implementation of initiatives and projects will be monitored by liaison officers and delivery units established in the ministries and government institutions for this purpose.
2. Monitoring the implementation of high-priority projects, so that these projects are closely monitored through PMDU team on a daily basis. PMDU will provide all forms of technical support to overcome any obstacles that may arise during implementation.

### Online Government Performance Monitoring System

An online system has been deployed to monitor performance and achievement. All parties involved will utilize the system to provide periodic reports and update data on work progress within the priorities and projects outlined in the Executive Program.
